# PRODUCT HANDBOOK

We design energy efficient devices

[velotechinnovations.in](http://velotechinnovations.in)

# COMPANY OVERVIEW

## Vision

Our core vision lies in providing the latest technology at affordable prices. As the already existing products with the same technology in the market are expensive and complex.

We are solving the problem and coming with the solution of cost effectiveness and better efficiency at same with less complexity. Also, the power backup feature that we are offering is not being given by any of our competitor, as a result they are unable to compete with our cost.

## Mission

With our first stage product, we are catering lower and middle class who are suffering from frequent power failure and cannot afford an inverter. We are aiming for selling 15000 pieces of fan in first year.

# OUR PRODUCTS

## Stack core axle flux motor

**VELOTECH**

**INNOVATIONS FOR  
TOMORROW**

# FUTURE TECH UNDER DEVELOPMENT

## Axial Motor for E-mobility

# AXIAL FLUX MOTOR FAN WITH POWER BACKUP UPTO 4 HOURS

## TECHNOLOGY

Stacking core  
axial flux motor  
Usp.

Consume  
extreemly low  
power input  
12 to 18 watt  
With in build  
battery backup  
Upto 3 to 4 hr

# PRODUCTS UNDER DEVELOPMENT

## AC 250 Watt

Will give power backup upto 2hrs after Power cut

**VELOTECH**

**INNOVATIONS FOR  
TOMORROW**

# COOLER 60 WATT

Power backup upto 5hrs  
functions at 18-20 watt  
Higher backup time on inverter system  
remote control upto 75% energy saving.

# PUMP 300 WATT
